What VVG Can Offer You

Communication And Negotiation

Before placing an order, we have a professional sales team available to assist you and discuss the details of your order.

Thoughtful Design

Our design team has extensive and unique experience in biodegradable tableware products. We can provide you with the most suitable solutions in terms of design research, strategy, functionality, and branding.

Research And Development

Innovation is an important factor in business development. Our R&D team strives for excellence in market prediction and new product development, providing continuous impetus for growth.

Resource Integration

For products beyond our product range, we recommend a comprehensive procurement plan to source your desired products. We can integrate them into our warehouse free of charge for unified management and transportation. This is made possible by the extensive contacts and resources we have accumulated in China.

Sample Confirmation

We can provide you with samples to better understand your requirements.

OEM & ODM

We serve as both assistants and participants, ensuring that the manufacturing process adheres to the highest standards and strictest protocols.

Flexibility

We do our best to maintain maximum flexibility in lead time and payment method. We put customer needs first in everything we do.

After-Sales Service

Just like a family doctor keeps track of your health, our sales team is in constant contact with you. We use any feedback you give us to improve our business with you.

Why us use Biodegradable Materials?

Sugarcane pulp's advantage.

1.It can be planted in a large area and has a short growth cycle, harvested 3-4 times a year.

2. bagasse left after the crushing of sugarcane.

3. It can be naturally degraded by landfill compost.

Bamboo more eco-friendly.

1.Bamboo reaches maturity in 3-5 years.

2.Produce more oxygen than trees.

3.No chemical needed encourage maturation process.

4.Less water requires than trees.

Advantage of Kraft Paper Tableware

1. Much more eco than disposable plastic tableware

2. High-strength material rather than cardboard paper

3. Sufficient market existing stock material with lower cost

4. Combines functionality with environment friendliness.
